TECA presents: *David Hill, Eneready Products & Gary Milligan, Hugh Milligan & Co.*

“Pre-Changeout Inspection”

When all of the existing air duct system is hidden behind gyproc, you are 'bidding blind' and should ask: "Can the existing duct system quietly & efficiently handle the air flow of the proposed new equipment?" With a few simple tests and two calculations, that you can 'peg' the hidden system in 15 minutes. You will know whether your new equipment will work well installed directly as-is or, if not, which one or two high pressure-drop fittings must be upgraded.

We will demonstrate this with TECA's Basics Model.

RSVP required: To attend, register on-line at www.teca.ca, or FAX this form to 604-594-5091

Your Company Name: _____

Please reserve seats for: _____

(full names)
